

CECO ENVIRONMENTAL Adwest

CECO Adwest Tower RTO's for Ethanol & Biofuels VOC Abatement

As a market pioneer in VOC abatement, CECO Adwest has a wide installed base of over 70 regenerative thermal oxidizers (RTOs) for ethanol, biofuels and Wet and Dry Corn Dryer VOC abatement since 1997. The Adwest, CECO Abatement and Met-Pro Brand Oxidizers provide our clients with extensive industry design and application experience backed by a nationwide 24/7/365 service network.

Benefits:

- Low Total Cost of Ownership - energy, maintenance & life cycle capital cost
- Energy-efficient – up to 97% RTO thermal efficiency for ultra-low energy usage and virtual NOx free operation
- Simple, Proven CECO Adwest Butterfly or Poppet Valve flow control-no complex rotary valves to adjust/maintain
- Custom PLC Controls with free lifetime telemetry service diagnostics
- Cost-effective, custom-design alloy RTO systems
- Proven CECO Adwest RTO 99% VOC Abatement

CECO Environmental Services can provide complete spare parts and PM service for all RTO brands as well as complete heat transfer media upgrades to maximize RTO reliability while minimizing your RTO pressure drop and energy usage.
